Wheat, Wheatfeed, Chicken Fat, Oats, Dicalcium Phosphate, Calcium Carbonate

Feeding Rate

Introduce gradually over a period of 5-7 days as part of a complete diet, mixed appropriately with other meat-based complementary pet foods. Typically feed 30% fresh meat with 70% mixer (by weight). Feed as appropriate to maintain weight and condition. In order to maintain and control your dog's weight to the optimum for the breed, a regular exercise programme is recommended. Always ensure that clean, fresh drinking water is available at all times.
